

Hyperbaric Chamber Rental

Now you can rent a Hyperbaric Chamber for use in your own home. Rent a ready-to-dive system that includes everything necessary and more; training in your home, on-going tech support and even the Oxygen is included. Oxygen is supplied from a safe, simple oxygen concentrator that removes Oxygen from the surrounding air and delivers it to the patient under pressure.

This is the most affordable method of bringing the healing power of hyperbaric oxygen to your family member. Eliminate the high cost of self-pay treatments, waiting in doctor's offices and time wasted driving back and forth to a clinic or hospital. In many cases the cost and difficulty of transporting the patient makes the HBO therapy non-practical. Administer the treatment on *your* schedule and at a fraction of the price of clinic treatment.

The standard system includes: Chamber, mattress, anti-roll bolsters, internal frame, air compressor, oxygen concentrator and all necessary connection hoses.

The system is assembled and tested onsite prior to training. Training is included with all rental systems.

Take advantage of this breakthrough in technology in your own home. A Doctor's Prescription is required. For more information contact your doctor or our Clinical Support Staff.

This is not an offer to rent a product or system for any medical application or purpose. Instruction is provided to identify how to use the products being offered for rent, however the intentions and applications for use of this product by the renter is their sole responsibility. Unless otherwise specifically identified in writing, the US Federal Drug Administration has not evaluated the system offered here.
